Landasan Teori

- **Inline CSS** adalah kode CSS yang ditulis langsung pada atribut elemen HTML. Setiap elemen HTML memiliki atribut **style**, di situ lah **inline CSS** ditulis.

Contoh :

```
<li style="text-align:center; color:red;" >List ini diedit menggunakan Inline Style</li>
```

- Embedded CSS adalah kode CSS yang ditulis di dalam tag **<style>** dan kode HTML dituliskan di bagian atas (header) file HTML.

Contoh :

```
<style>
```

```
h1 {color: white;text-align: center;}  
p {font-family: verdana; font-size: 15px;}  
h3{color:green; font-size:20px;}
```

```
</style>
```

Pada syntax dibawah digunakan css dengan **inline style** dan **embedded style**

```
<!DOCTYPE html>
<html>
<head>
<style>
body {
  background-color: lightblue;
}

h1 {
  color: white;
  text-align: center;
}

p {
  font-family: verdana;
  font-size: 15px;
}

h3{
  color:green;
  font-size:20px;
}

</style>
</head>
<body>
